SECRET/ 25X1 -2-From 9 a.m. to 1 p.m. on 18 February, single-engine aircraft were observed flying individually and in formations of two, each of the two planes leading alternately. A biplane was also seen aloft. At 5 p.m., a single-engine plane practiced acrobatics. On the afternoon of 26 February, a jet plane repeatedly appeared over the town of Cottbus leaving again in the direction of the airfield. On the afternoon of single-engine monoplanes fitted with 25X1 radial engines between Dahlitzer Weg to the south of field and the runway. At two-minute intervals, five of these planes taxied to the runway and then repeatedly practiced take-offs. On 2 and 3 March, these planes were again seen over Cottbus. In late February, a number of crates with Russian lettering were unloaded at the Cottbus freight station. The crates had the size of the superstructure of a boxcar. 6. Between 4 and 5 a.m. on 25 February, aircraft 25X1 continuously flew over Cottbus. In the course of the day, flights of jet bombers three times flew over the town. Acrobatics and formation flying were practiced at the airfield. A biplane flew circles over the field. Some of the planes involved in flying took off in groups of two. At 10:45 a.m. on 26 February, four jet fighters flying at an altitude of about 800 meters over Cottbus were observed firing bursts from their weapons. On 27 February, local flying and acrobatics were practiced by Yak-18s. In the afternoon, single-engine planes fitted with radial engines practiced local flying. On 28 February, flight training began at 7:15 a.m. In the afternoon, jet fighters were observed aloft. 7. On 26 February, a sizable number of aircraft packed in crates arrived at the field. When the planes were unpacked, 25X1 were fitted with radial engines and were similar to the German FW-190 planes. Already on the same day, circles were flown over the field with some of these planes. In the early afternoon of 1 March, jet fighters were circling over 25X1 Cottbus and then left toward Grossenhain. At 10:30 a.m., a plane of the same type had taken off from the field. On 2 March, | Yak-18s in four open hangars of the field. A Li-2 was seen in front of a hangar, while 11 Yak-11s were parked 25X1 beside the runway. Four Yak-lls circled over the field. The crews of these planes were apparently rotated after one circle had been flown. observed two Yak-lls flying in On 9 March. 25X1 formation. On 11 March, local training flights and acrobatics were observed. 10. On 8 March, six railroad tank cars arrived at the field; five were loaded with 300 hectoliters each, while the sixth carried 630 hectoliters. In early March, 50 to 60 crates, 40 of which dating from a more recent delivery, were observed in the northeastern portion of the field.

2. Comment.

25X1

The description of the new type of plane given and the statement that it looked like a German FW-190 plane indicates that the planes newly arrived at the installation were Yak-lls. Training on this type of aircraft is probably conducted before training with MiG-15s is started.
